PROJECT: Cuyahoga River Bulkhead Condition Assessment Services

RE: Link to Download Historical Inspection Data

Attention Interested Firms:

Due to file size limitations, historical inspection data can be downloaded from the following link:
<https://portofcleveland-my.sharepoint.com/:f/p/cbeck/EvwLjM5ADjZMhkoQ5hfJbMBtmeoGUdzF6-kqMehhmkFow?e=lbeebe>

2013 data was collected during a contracted comprehensive above and below the waterline inspection and consists of parcel summary information, inspection photographs, and survey images. 2020 data was collected during an internal above the waterline visual assessment and is organized in an Esri file geodatabase/ArcGIS Pro project package. It is the Port Authority's objective to consolidate all historical records into GIS format and be prepared to conduct future inspections using ArcGIS Field Maps or related data collection application.

If there are any questions during the SOQ process, please do not hesitate to submit them via email to carly.beck@portofcleveland.com. The Port Authority will be posting the responses to all questions on our website for all interested firms to review.
